

AcoustiGuard™

Duracoustic®

Sound Control Underlayment

The Highest Acoustic Performance Available.
"Cuts Out All That Racket From Upstairs."

- ▶ Greatly reduces impact sound
- ▶ Meets or exceeds the most stringent sound ratings
- ▶ Provides a break in the sound transmission through the floor-ceiling assembly
- ▶ Prevents noise flanking room to room
- ▶ Easy to install
- ▶ Cost effective

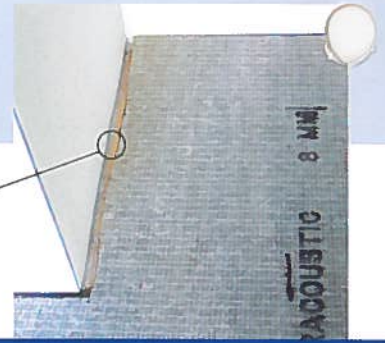

AcoustiGuard™

Get The Duracoustic® Advantage

- ▶ Very fast and easy installation
- ▶ Lays flat and stays in place
- ▶ Conceals minor subfloor irregularities
- ▶ Economical - no waste

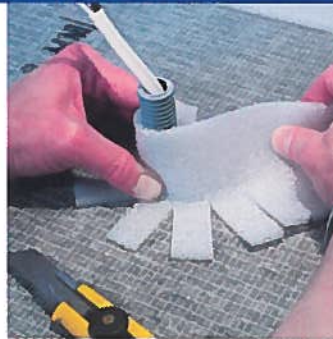

Exact cutting of the Duracoustic® is not necessary – AcoustiGuard™ EdgeSeal makes up for site cutting variances.

Duracoustic® & AcoustiGuard™ EdgeSeal – The Reliable Sound Control System

EdgeSeal is very flexible and easily conforms to outside and inside corners along the floor-wall locations.

EdgeSeal is ideal for penetrations like columns, conduits, piping and transitions at door jams and stairways.

Tape is used to seal against Duracoustic® and prevent leakage. Floor ready for poured topping.

AcoustiGuard™ EdgeSeal Ensures The Integrity Of The System

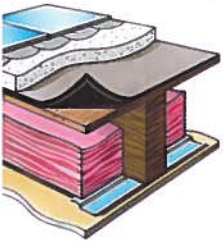

EdgeSeal is waterproof. It comes pre-hinged to conform to any contour.

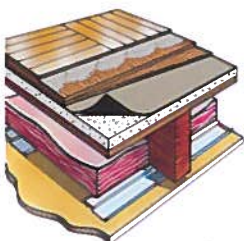

Note that exact cutting of the Duracoustic is not necessary. AcoustiGuard™ EdgeSeal makes up for site cutting variances.

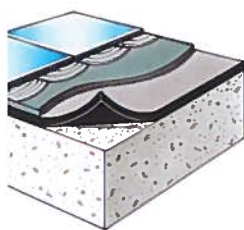

Superior Performance In A Wide Variety Of Applications

▶ STC-70 IIC-57

▶ STC-64 IIC-55

▶ STC-55 IIC-52
